SACRAMENTO COUNTY • JULY, 2019

SACRAMENTO LITERACY RATES ON THE RISE
READ ABOUT IT INSIDE

The purpose of the Sacramento County Community Literacy Map and this resulting annual report card is to illustrate Sacramento County’s progress on key literacy indicators over time and then identify where literacy resources and interventions are needed most in Sacramento County.

The Community Literacy Map and resulting Report Card is the product of an informal collective impact collaboration designed to increase awareness and resources on behalf of children’s literacy here in Sacramento County. This year, the Community Literacy Map gave Sacramento County the data it needed to create a more formal Literacy Movement that seeks to help all children in Sacramento County reach grade-level reading.

Literacy Indicators / Trends
These graphs compare trends for California, Sacramento County, and Sacramento County schools with youth literacy programming (Provider Schools) on several key literacy indicators. Youth literacy program providers target high need schools in the County. Trend years are based on the most current data available. See Page 2 for additional definitions and sources.

Early Childhood Education.
Percent of children ages 3-4 enrolled in preschool.

Chronic Absence.
Percent of students reported chronically absent per enrollment.

Preschool Enrollment

Chronically Absent Students

Between 2016/17 and 2017/18, chronic absenteeism rates decreased slightly in Sacramento County and schools with literacy programs (where rates are highest).

English Language Arts (ELA) Proficiency.
Percent of students who met/exceeded CAASPP ELA standards.

ELA Proficiency | 3rd Graders

ELA Proficiency | All Grades

3rd graders in schools with literacy programs experienced the greatest positive change between 2014/15 and 2017/18.

Between 2014/15 and 2017/18, ELA proficiency increased overall. However, proficiency in Sacramento County remains below state levels.

Public Library Summer Reading Program Participation | Sacramento County.
Number of youth who enrolled and completed program.

Summer Reading Participation | Sacramento County

While enrollment has decreased slightly over time, the total number of youth completing Summer Reading is on the rise.

THE SACRAMENTO PUBLIC LIBRARY FOUNDATION is pleased to announce that they have officially become the Sacramento convener for the Campaign for Grade-Level Reading. If you would like to participate in creating Sacramento’s Literacy Movement, please contact the Foundation directly by email at april@saclibraryfoundation.org or by calling 916-836-3540.
The Literacy Report Card is a tool to measure the progress Sacramento County children are making toward achieving grade-level reading and writing.

This report will help philanthropists and education leaders determine what is needed to advance children's literacy. The California Assessment of Student Performance and Progress, CAASPP results combined with the summer reading, kindergarten readiness and school attendance data reveal some good news and some challenging news for Sacramento County.

The good news is 3rd grade reading levels in Sacramento County increased by 5.8 percentage points (approximately 1,150 3rd graders) between 2016/17 and 2017/18, and increased by 1.6 percentage points (approximately 3,235 children 3rd – 12th grade) in overall reading levels. These are significant increases and reflect the tremendous effort that Sacramento literacy providers have made to increase children's literacy. Among the 58 counties in California, Sacramento ranks 13th in increasing 3rd grade literacy levels this year, and 17th in increasing 3rd-12th grade literacy levels.

**SUMMER READING**

The Sacramento Public Library's Summer Reading Program has seen great successes and can boast an enrollment of 27,501 children with 17,592 children who completed the program by reading five age-appropriate books during summer of 2018. According to research, reading five age appropriate books is what it takes to hold onto earned reading skills. Our Library reaches nearly 10% of Sacramento County children and over 6% are reading five books. The Sacramento Public Library is to be commended for their tremendous effort and encouraged to continue growing its Summer Reading Program.

**KINDERGARTEN READINESS**

Preschool enrollment in Sacramento County has been on an upward trend since 2014, but decreased by 8 percentage points in 2017/18. Fortunately, the new Governor of the State of California, Gavin Newsom, is aware of the need to increase preschool enrollment and is expanding the State's budget to reflect this priority. Governor Newsom increased the state budget in 2019 by $2.4 billion for early childhood programs and aims to enact universal preschool for all low-income children in California. Here in Sacramento, local organizations such as First 5 Sacramento, the Central Valley Foundation and the Sacramento Public Library are also working to expand early childhood education opportunities throughout Sacramento.

**SCHOOL ATTENDANCE**

School attendance is the third primary factor effecting a child's ability to achieve grade-level reading. School attendance is especially important in early years because children learn to read during the Kindergarten to 3rd grade school years. By the eighth grade, attendance becomes the number one predictor of high school dropout rates. In 2018, chronic absence in Sacramento County decreased to 13%, while the State average slightly increased but remained at 11%. The United Way California Capital Region has been working to bring school districts together to develop mechanisms to help more children attend school regularly.

---

1. Literacy rates for grade-school children in California are measured annually through the California Assessment of Student Performance and Progress, CAASPP.
4. Chronic absenteeism is defined by California Department of Education as missing 10% or more of total school days.

Definitions of Literacy Indicators & Sources

Early Childhood Education. The percent of children ages three to four who are enrolled in school (i.e., nursery school, preschool). Source: US Census Bureau, American Community Survey, 1-Year Estimates, Table S1401: School Enrollment [https://factfinder.census.gov/]

Chronic Absence. Chronic absenteeism rate. Students are determined to be chronically absent if they were enrolled for a total of 30 days or more at the selected reporting level during the academic year and they were absent for 10% or more of the days they were expected to attend. CDE began tracking this data in 2016/17. Source: California Department of Education, DataQuest [https://dq.cde.ca.gov/dataquest/]

Note: Chronic Absenteeism replaced Truancy as a measure of school attendance in 2016. Truancy is no longer reported in DataQuest.

English Language Arts (ELA) Proficiency | 3rd Grade/All Grades. California Assessment of Student Performance and Progress (CAASPP) outcomes are reported in terms of four levels of achievement: Level 1 (standard not met), Level 2 (standard nearly met), Level 3 (standard met), and Level 4 (standard exceeded). These correspond to a set of achievement level descriptors that are aligned with the Common Core State Standards (CCSS) and the Smarter Balanced assessment. Based on their CAASPP scaled scores, students fall into one of the four categories of performance. Students performing at Level 3 (standard met) and Level 4 (standard exceeded) are considered on track to demonstrating the knowledge and skills necessary for college and career readiness.
